DETAILED ACTION

1. Claims 8-9 are directed to an allowable product. Previously withdrawn from consideration as a result of a restriction requirement, claims 8-9 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on May 11, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Christopher Wheeler on May 19, 2008. The application has been amended as follows:

Drawings

3. The following changes to the drawings (received on January 24, 2008) have been approved by the examiner and agreed upon by applicant:

a) Figures 1a, 1b, 2a, 2b, 3a and 3b;

i. "Related Art" has been replaced with -- Prior Art --.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance for Claims 1-10: the prior art does not disclose or suggest a device for adjusting the angle of a sighting unit to a target, in particular for a geodetic measuring instrument including a sighting unit, which is rotatable about an axis, a reference base, at least one bearing for mounting the sighting unit to be rotatable relative to the reference base, a gear, a clutch unit, the gear and clutch unit being connected in series between the sighting unit and the reference base, a torque flux around the axis between the sighting unit and the reference base occurring via the gear and the clutch unit, unless the torque flux is interrupted by the clutch unit, wherein the clutch unit has at least one electromagnet arranged around the axis for generating a magnetic field in combination with the remaining limitations of the claims.

Art Unit: 2841

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
